Wargaming technology competition

1. **Form 4 teams & choose a leader**
2. **Pick a country (US, China, France, Russia)**
3. **Leaders delegate a "czar" for:**
   - Education policy [secondary + tertiary]
   - Technology strategy [basic + applied]
   - Intelligence community [immigration + espionage]

Strategy Briefs: Each czar does independent research on the current status of their country in that respective domain. In a Google doc, collectively write up a report discussing real-world findings in each domain. Leaders meet with me to discuss game rules. Then: teams formulate starting strategies.

- Starting strategies can differ from real-world strategies, but explain how/why.

Wargaming technology competition

- Go over game rules together.
- Each turn represents an interval of time (1-3 years).
- Meet with teams; leader reviews strategy brief recommendations & makes initial decisions (10 mins).
- Once Round 1 decisions are in, tabulate results & proceed to Round 2.
- 5 mins to review results & determine next-round strategies.
- We will play 3-7 rounds (undeclared) & review results.
